

MVC Developer

SKILLS REQUIRED:

Knowledge of: MVC development (Ruby on rails and/or Django and/or Struts), AJAX, JQuery, JavaScript, Git, SQL, XML, SOAP/WSDL, Rest

JOB DESCRIPTION:

Software Developer - Software Engineer

We are building a new successful IT company working on Opensource technologies. If you like flexible hours, if you want to work at home, if you are living everywhere in Bulgaria, please read on! Our organization is net-based and all of our collaborators work remotely.

What you need for this software development position:

- At least 1+ years of experience building and testing web applications
- Confidence to work in a fast-paced environment
- Proficiency with AJAX based websites and JavaScript and jQuery experience
- A passion for building technologies that help companies and investors succeed
- Authorization to work in Bulgaria for any employer.

What you'll be doing:

- Building and testing complex applications and working in collaboration with our back-end developers

- Preparing environments and deploying applications
- Take care of software maintenance

What's in it for you:

- Competitive base salary based on your work experience and technical competencies
- Flexible work schedule, creative attitude, international environment, and more!
- The chance to work for a startup that's making a difference with their technology

So, if you are a software Developer with frontend/backend development experience, please apply today!
